GOODS & PERSONS ELEVATORS – 1,5T – 2,2mx1,36m – 3,0m – 0,45m

Developed and manufactured for both the real estate business and factories, this goods and persons elevator with embarked people TSD 1500 is driven by a PLC (EdmoLift UC60 electronics) that operates the sequence in dead man's control, only allowing the gates to open when the platform is in lower or upper position. Positioning is given by the upper and lower limit switch.

It is equipped with remote power pack with steel cover. This enables accessible maintenance and uncomplicated visual inspection.

The platform rests on a mechanical stop in the lower position and ensures a fixed foundation for loading / unloading. Lifting eye bolts makes the table easy to put in place during installation by using a fork lift.

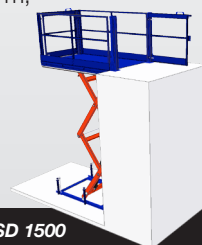

This project also includes an additional gate with electric interlock for the upper level.

The PLC offers a guidance during fault tracing by connection a service control unit with buzzer functionality. The buzzer indicates the problem by giving different sequences, easy to translate and circle the problem.

This goods & persons elevator is used to move staff and goods within industrial buildings and real estates between two levels.

By investing into this goods and persons elevator with a capacity of 1500 kg, equipped with a 2,2mx1.36m platform, you'll benefit from a lifting stroke of 3,0m and a closed height of 0,45m.

Feel free to contact us for further information about potential modification that would suit the specifications of your project.

K21177 TSD 1500 GOODS & PERSONS ELEVATORS CHARACTERISTICS

TSD 1500

Capacity: kg	Length platform mm	Width platform mm	Lifting stroke mm	Closed height mm	Hydraulic power pack	Lifting time sec	Voltage VAC	Power kW	Ctrl voltage VDC	IP	Certificate
1500	2200	1360	3000	450	Remote	55	3-380	1,5	24	54	CE, Machine directive & EMC

Security feautres: All gates equipped with Interlocks, remote power pack with steel cover and mechanical stops in the base frame
